

Partial List of Rogue Security Software*

The following is a partial list of rogue security software, most of which can be grouped into families. These are functionally-identical versions of the same program repackaged as successive new products by the same vendor.

NOTE: If you have installed ANY of these rogue products, YOU ARE MOST DEFINITELY infected by at LEAST a trojan and likely a LOT of malware. SEE A PROFESSIONAL such as Just Works IMMEDIATELY.

- * Advanced Cleaner
- * AlfaCleaner
- * AntiSpyCheck 2.1
