

A Nashua, NH Based Company

Just Works is a Nashua, NH based small company which opened in April 2008.

Originally located on Amherst St., we have closed our public office in favor of being able to *maintain the lowest possible prices* without the added rent costs.

We now operate just a workshop downtown, where we can service the entire area without having to rent and staff a full time office.

This means you get a *local company* which can offer *on-site, in-person* service throughout the Nashua area.

***Area Served**

We offer our *FREE Pick-up and Drop-off* service to any customer within a 10 mile driving distance from Nashua City Hall. We ask for a minimum of \$120 total service for anyone over 10 miles but under 50 miles away. On-site or pick-up and Drop-off service farther away will be charged per mile that we have to drive.

FREE Consultation

Just Works offers a *FREE initial consultation* so you can see what we can do for you!

We will send a computer and Internet expert to your site* or talk to you over the phone about how we can make your IT resources and the Internet serve you better.

Contact Us

To schedule your *FREE Consultation* or to *make an appointment* to have a Just Works expert come out to you, here's how to contact us:

Are You Getting the Most Out of Your Computers & Website?

Introduction

Most small business owners probably have no idea how much more business they could get and how much more efficient their business can be if only they optimized their resources.

Just Works Computers specializes in small business IT and website creation at a price any business can afford.

Read on for more information on how you can make the most of your IT resources!

On-Call, On-Site Service*

Just Works has recently cut our overhead expenses by closing our main office on Amherst St. and moving to an *On-Call and On-Site service plan*.

That means you no longer have to come to us! *We can come to you!*

We also offer 24 hour emergency response service should you need it. Contact us for details.

FREE Pick-up and Drop-off*

If you have a computer that can't be fixed quickly, we can bring it to our new workshop in downtown Nashua and return it to you

repaired at *no extra charge!*

This can save you hours of on-site time because at our workshop, we can work on several computers at once, thereby *passing the savings on to you.*

Professional Website Design

Drawing on *over a decade* of website design and Internet consulting experience, **Just Works** specializes in creating robust, easy to maintain websites for small businesses.

We can develop a highly functional site with built-in *Search Engine Optimization* and even integrate your website with the most popular *Social Media* sites such as Facebook and Twitter. And we can get you up and running *FAST!*

Virus Removal & Recovery

If you suspect you have a virus or other malicious software on your computer, the bad news is that you probably do!

The good news is that **Just Works** can help!

We've been performing virus removal for even longer than we've been designing web sites - over 15 years now!

Proper virus removal takes more than just a simple scan. **Just Works** knows how it needs to be done and can clean your computer system and make sure you have up to date anti-virus software all for *one flat rate!*

Because of the time involved, we will insist on our free pick-up and delivery service for this though. A thorough virus removal can take 24-48 hours depending on the severity.

System Optimization

Over time most computers, especially those running *Windows* will begin to slow down. Part of this is due to all the security and bug-fix updates. Part of it though can be alleviated with a proper optimization.

Just Works can take a look at your system and get it running as fast as the hardware and necessary software will allow.

As with virus removal, this can take some time, so we offer this service at a flat rate and include the free pick-up and drop-off service. No worries though. *We've got you covered.*
